

Sexy Silhouette Shadow Lamp

Written By: marcel goeckler

TOOLS:

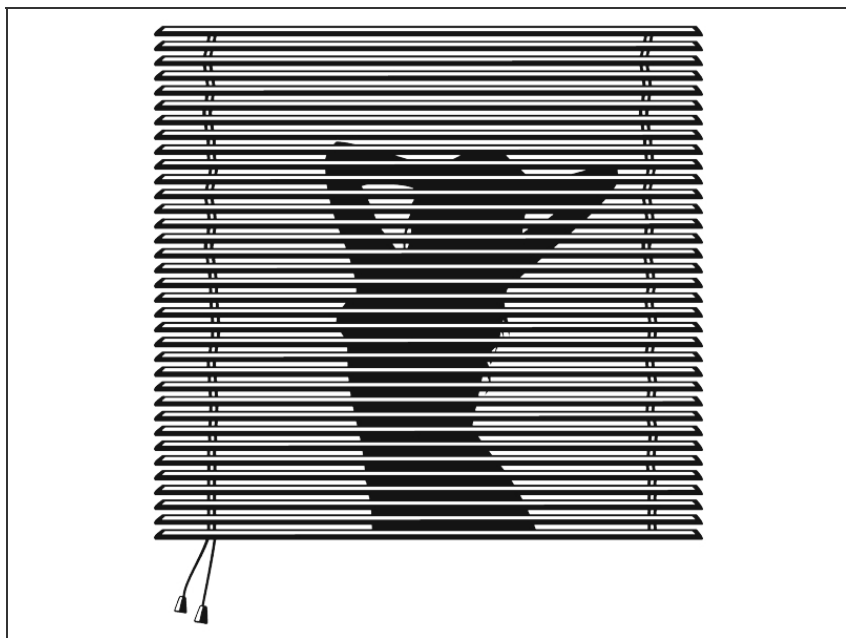

- [Glue \(1\)](#)
- [X-Acto knife or box cutter \(1\)](#)

PARTS:

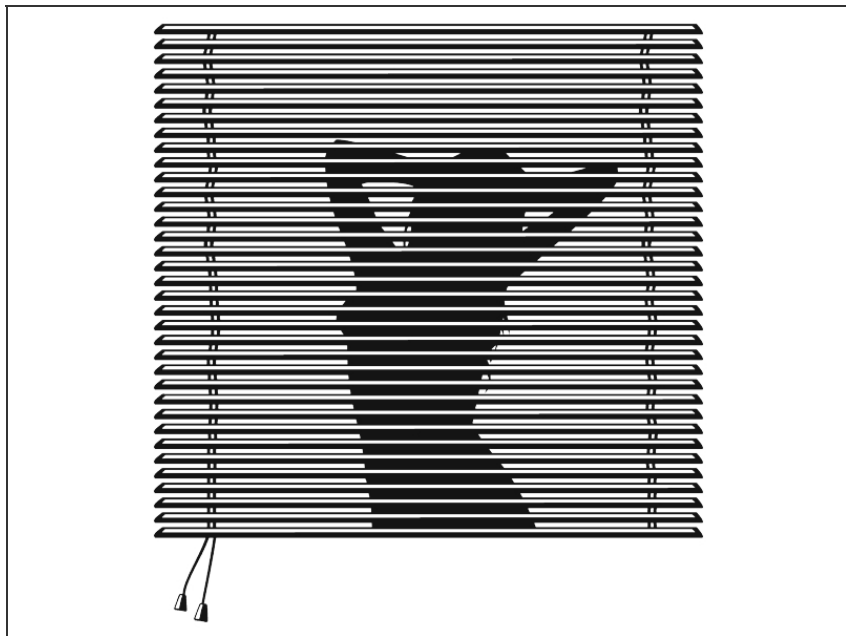

- [LED strips \(1\)](#)
- [picture frame \(poster-size\) \(1\)](#)
- [poster of a posing woman \(1\)](#)
- [black cardboard \(1\)](#)
- [Window blinds the same size as the picture frame \(I prefer wooden ones\) \(1\)](#)

Step 1 — Sexy Silhouette Shadow Lamp

- First cut out the silhouette of the woman (or man!) in the poster. Trace it on the black cardboard and cut it out. Glue the cardboard silhouette on the backside of the poster cut-out. Now glue the LED strip on the back of the cardboard. Assemble this in the picture frame with some space behind the silhouette so that the LEDs can illuminate the wall and create a soft glow.

Step 2

- Now install the window blinds at the top of the frame. Hang the frame on the wall you chose and lower the window blinds. Open the blinds a bit to give the effect of a window with a shadow on it. Turn on the LEDs and enjoy your new lamp with the sexy silhouette shadow.
